**General Information**

- **Job Title:** Program Manager, Global Enterprise Projects (Applications and Infrastructure)
- **Location:** TBD/Hybrid/Remote
- **Salary Range:** Commiserate with Level of Experience

**About IT3 Technology Consortium**

IT3 Technology Consortium is a leader in providing senior-level Program and Project Management resources to organizations undergoing complex transformations. We specialize in ensuring the successful execution of critical initiatives, from large-scale technology implementations to comprehensive Mergers & Acquisitions and Divestitures. Our approach is built on a foundation of strategic leadership, meticulous planning, and a deep understanding of business operations. We provide the expertise and leadership necessary to navigate complex projects on time and under budget while maintaining business continuity.

**Position Overview**

We are looking for a highly accomplished Program Manager with a strong background in leading global, enterprise-wide technology projects. This role offers hybrid and remote work flexibility but requires 10-25% travel for client engagement, team coordination, and international site visits. The ideal candidate has deep expertise in managing programs that encompass both application and infrastructure components across national and international sites. This role requires a strategic leader who can coordinate diverse, multi-disciplinary teams and manage complex dependencies to deliver transformative projects on time and within budget.

**Key Responsibilities**

- Global Program Leadership: Lead the full lifecycle of complex, global technology programs, including application rollouts, infrastructure upgrades, and system consolidations across multiple countries.
- Strategic Planning & Governance: Develop and implement program strategies that align with global business objectives. Establish and enforce governance frameworks to ensure consistent execution, quality control, and risk management across all project workstreams.
- Stakeholder & Vendor Management: Expertly manage relationships with global stakeholders, including C-level executives, and facilitate communication across different regions and time zones. Manage international vendor relationships, ensuring contracts and deliverables meet program requirements.

- Budget & Resource Management: Oversee multi-million-dollar program budgets and resource allocation across global teams. Monitor program performance and implement corrective actions as needed to maintain financial and operational targets.
- Risk Mitigation & Change Management: Proactively identify and manage risks associated with international projects, such as cultural differences, regulatory compliance, and logistical challenges. Champion change management efforts to ensure smooth adoption of new technologies across the enterprise.

**Required Skills & Qualifications**

- Bachelor's degree in Computer Science, Business, or a related technical field.
- 10+ years of experience in program management, with a minimum of 5 years managing global enterprise projects.
- Proven expertise in both application and infrastructure domains.
- Demonstrated ability to lead large, multi-disciplinary teams in a matrixed organization.
- Exceptional cross-cultural communication, negotiation, and leadership skills.
- Experience with international travel and managing projects in different regions (e.g., EMEA, APAC, and the Americas).
- Willingness and ability to travel 10-25%, including international travel, as required for program needs.
