About IT3 Technology Consortium

IT3 Technology Consortium is a leader in providing senior-level Program and Project Management resources to organizations undergoing complex transformations. We specialize in ensuring the successful execution of critical initiatives, from large-scale technology implementations to comprehensive Mergers & Acquisitions and Divestitures. Our approach is built on a foundation of strategic leadership, meticulous planning, and a deep understanding of business operations. We provide the expertise and leadership necessary to navigate complex projects on time and under budget while maintaining business continuity.

Job Summary

We are seeking a highly skilled and strategic Program Manager to lead and manage technology-focused Mergers & Acquisitions (M&A) and Divestiture programs for our diverse client base. This role offers hybrid and remote work flexibility, but requires 10-25% travel to client sites and key stakeholder meetings. The ideal candidate is a seasoned leader with a proven track record of managing complex, multi-million-dollar projects and leading multi-disciplinary teams through the full lifecycle of M&A transactions. This role requires a strong technical foundation and the ability to act as a trusted business advisor, ensuring strategic business objectives are met through the successful integration or separation of technology systems and operations.

Key Responsibilities

- **Lead M&A and Divestiture Programs:** Drive the full project lifecycle, from initial due diligence and RFP governance to post-merger integration or divestiture.
- **Strategic Planning & Governance:** Develop and implement comprehensive program strategies, plans, and roadmaps that align with the client's strategic business objectives. Establish program governance and controls to ensure efficient and effective execution.
- **Technology Integration & Change Management:** Expertly manage the implementation and integration of technology services and infrastructure (e.g., data center migrations, system consolidations, application rationalization) while leading change management efforts to minimize business disruption.
- **Team & Stakeholder Management:** Lead and mentor large, multi-disciplinary teams (both internal and external) to deliver projects on time and under budget. Manage

relationships with key stakeholders, including C-level executives, and provide clear, consistent communication on program status, risks, and mitigation strategies.

- Financial & Vendor Management: Oversee and manage multi-million-dollar program budgets. Manage vendor relationships, including partner qualification, contract negotiation, and creating synergies that limit redundancies.
- Risk Mitigation: Proactively identify potential project risks and develop robust mitigation plans to ensure project success while maintaining existing business and manufacturing operations.

Required Skills and Qualifications

- Bachelor's degree in Computer Science, Business, or a related field.
- 10+ years of progressive experience in program and project management, with significant experience in M&A, Divestitures, and Change Management.
- Proven history of successfully leading complex, global projects to completion.
- Strong technical background with the ability to understand and manage complex technology integrations.
- Exceptional leadership, communication, and negotiation skills.
- Demonstrated ability to build targeted enterprise business relationships and act as a strategic business advisor.
- Experience in managing multi-million-dollar budgets and leading large, multi-disciplinary teams.
- Willingness to travel 10-25% to client locations and for team meetings.

To Apply

If you are a results-oriented Program Manager with a passion for driving organizational excellence and a proven track record in M&A, we would love to connect with you. Please reach out directly to: info@it3tc.com
