

General Information

- **Job Title:** Project Manager, Global Enterprise Projects (Applications and Infrastructure)
- **Location:** TBD/Hybrid/Remote
- **Salary Range:** Commiserate with Level of Experience

About IT3 Technology Consortium

IT3 Technology Consortium is a leader in providing senior-level Program and Project Management resources to organizations undergoing complex transformations. We specialize in ensuring the successful execution of critical initiatives, from large-scale technology implementations to comprehensive Mergers & Acquisitions and Divestitures. Our approach is built on a foundation of strategic leadership, meticulous planning, and a deep understanding of business operations. We provide the expertise and leadership necessary to navigate complex projects on time and under budget while maintaining business continuity.

Position Overview

We are seeking a results-driven **Project Manager** to execute specific workstreams within a broader program focused on global application and infrastructure projects. This is a **hybrid and remote work** position with a travel expectation of **10-25%** for on-site meetings and project deployments. This role is ideal for a hands-on leader who can manage technical details, coordinate with international teams, and ensure project deliverables are met with precision and quality.

Key Responsibilities

- **Global Project Execution:** Manage project plans, schedules, and resources for specific application or infrastructure projects across national and international sites.
- **Cross-Functional Coordination:** Collaborate with technical teams, business stakeholders, and vendors in various global locations to ensure alignment and timely delivery of project milestones.
- **Risk & Issue Management:** Identify and track project risks and issues, escalating as needed. Develop and execute mitigation plans to keep the project on track.
- **Status Reporting:** Provide clear and concise project status updates, including progress against timelines, budget, and scope, to the Program Manager and key stakeholders.
- **Implementation & Deployment:** Coordinate the successful deployment of applications and infrastructure components in different regions, ensuring adherence to local requirements and standards.

Required Skills & Qualifications

- Bachelor's degree in a technical or business-related field.
- 5+ years of experience in project management, with prior experience in global or large-scale enterprise projects.
- Proven experience managing projects that involve both application and infrastructure components.
- Strong organizational skills and attention to detail.
- Excellent communication skills, with the ability to work effectively with international teams and stakeholders.
- Ability to travel 10-25% as needed to support project deployments and team coordination.
